Subject: Emerald CNC Coolant

Adam,

Thanks for the help with the transition of coolant in our CNC. The guys love Emerald CNC so far and we want to start on the 2nd machine. They've said the smell is pleasant, and the fluid clarity allows them to see their work much better than the milky product we were using before. According to Daniel, we have enough of the cleaner but I will need 5 more gallons of the coolant. We're ready to buy some!

Thanks,

Rob Fuller
